How to have difference user access the same function but with difference mode

How to have difference user access the same function but with difference mode.

For example: Administrative user have full access right where customer service can only view the data. Use Sales and Credit Invoice as an example

1 Create a user group – example view

2.Create a user – example view

System Manager – Menu Maintenance – Sales

No	Description/Group	Type	Selection	Mode	Tab Location	Icon Path
10	Customer Sales Order	Form	A210POrder	Default	1.Operations	C:\Clarity\Icon\

130	Invoice on DO	Form	A210PInvoiceonDO		1.Operations	C:\Clarity\Icon\
ACCOUA						C:\Clarity\Icon\

Highlight the option (left most column) of the row you want to duplicate and press - ctrl C to copy.

Move all way down to bottom until you see left column with * sign. Click on the * sign and a right triangle appear, press Ctrl-V to paste.

Change the number to any number greater than 999, recommend to start from 2000. Under Mode column, click on the dropdown and select mode you want, this example, I select view only.
