

Why Does the System Prompt Me This Exchange Rate Message?

- If you are transacting in a foreign currency, the system will prompt you for an exchange rate if there isn't one specified on the date of the transaction.
- To ensure you do not get this message, simply enter the appropriate rate on the date of transaction in GL - Currency rate table.
- Even if you do not have a rate, the message simply asks whether the user wants to pick up the rate 1.3567 on 01/11/2019. If the answer is YES, then it will pick up 1.3567. Else, on NO it will pick up the default rate in Currency Table.

Note: This is not an error message but a prompt to remind the user an exchange rate is required because a non-local currency was selected in the transaction.
