

How to configure / install COS system in my PC?

- 1.** In COS folder, when click 'a21UI.erpwinform.exe', 'type-configuration'. A notepad will show then look for line 'a21constring'.

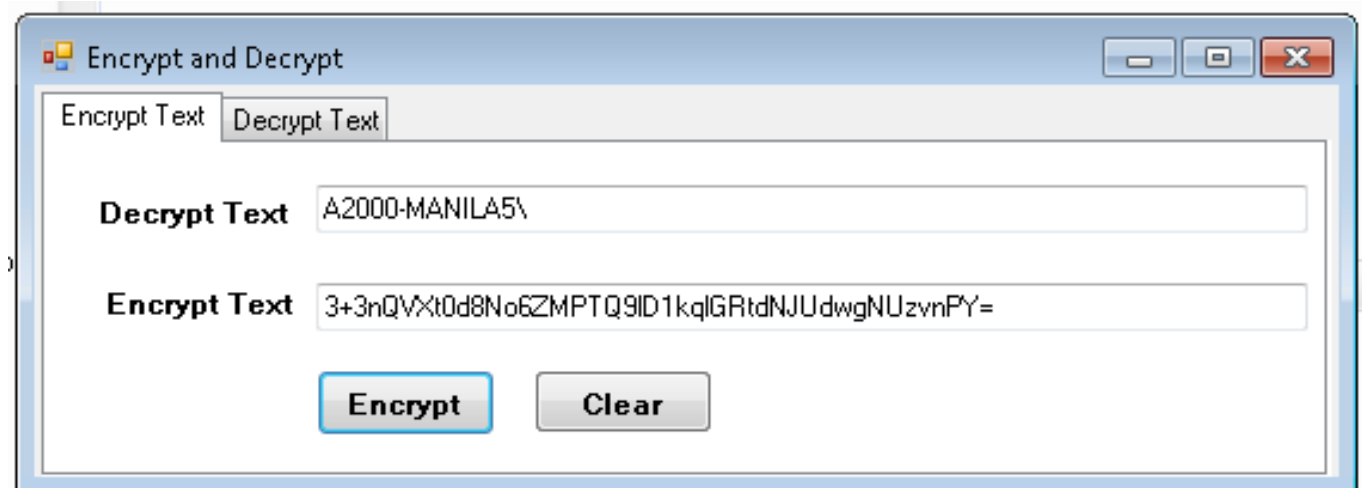

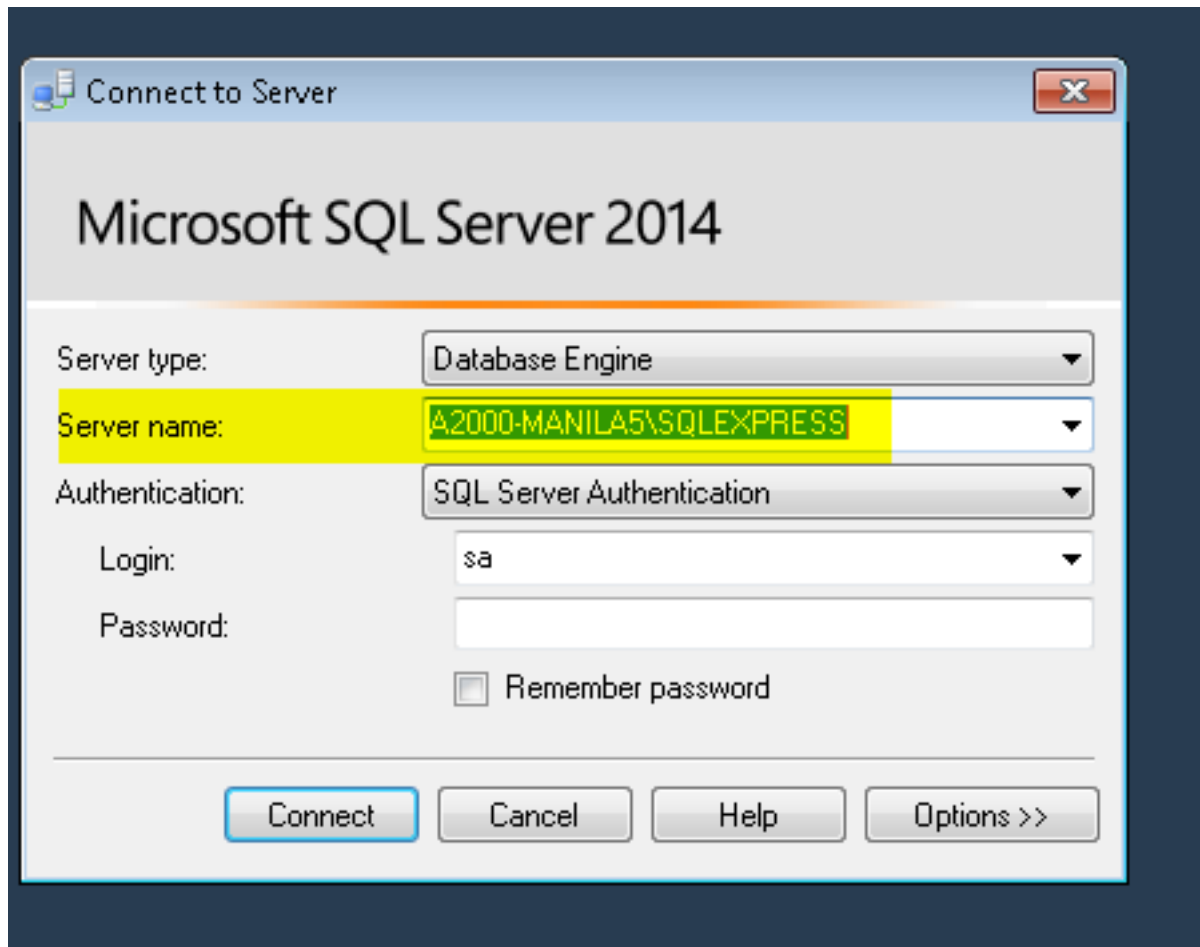

- 2** From the following lines- need edit are 1)Datasource [server name] 2)Catalog

A2000ERP ~ IT-RELATED

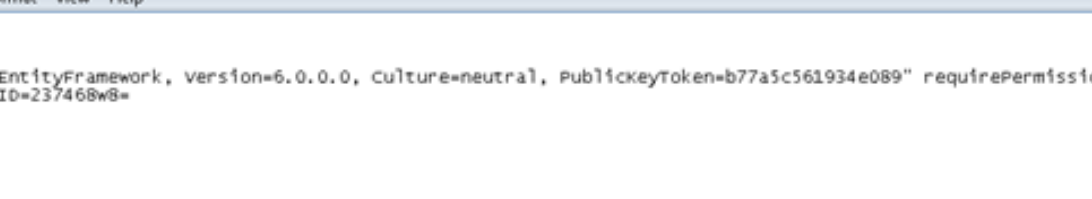

[database name] 3)username [sample-'SA'] and 4) password [sample-A*****] .

To edit datasource = sample[a2000-manila-5\] using decrypt [encrypt decrypt system]. Then copy & paste encrypted '3+3***' in the notepad.

3 Same process on catalog, user id, password & license server.
